## FLOORPLAN - SHORT STATIONS (not exact or to scale)

In the real thing the cohort of 10 trainees does a circuit with 8 examined short stations and 2 inactive byes to manage the numbers.  
We have half the number of active stations and use more byes to manage our numbers.

## FLOORPLAN - LONG STATIONS (not exact or to scale)

In the real thing the cohort of 10 trainees splits into two circuits of 5 trainees each, with 3 examined stations and two Byes (one of which might be an active Bye). We just run one long station circuit and have more Byes, to manage our numbers.
